## EARTH DAY

2016  University of Washington

Learn how you can get involved with sustainability at UW year-round: [green.uw.edu](http://green.uw.edu)

# tapthat

Tap H<sub>2</sub>O is the way to go!

## facts

**less plastic** **MORE MONEY!**

Reusable water bottles can save you hundreds of \$ each year, while also reducing waste and improving the environment.

Seattle has some of the finest tasting, purest **TAP WATER** **IN THE WORLD**

Our water comes directly from the Cascade mountains through rivers and lakes and is tested daily.

Last year, the **average American** used **167 disposable bottles**, but only **recycled 38**.

**3 TIMES** more water is required **to produce a single plastic water bottle** than the bottle will hold

You can fill your reusable water bottle at any water fountain on campus, and many buildings (like the HUB) have specific water bottle refill stations. See all the stations on campus: [green.uw.edu/refill](http://green.uw.edu/refill)
