

# Climate Town Hall

## State action on climate has never been more important.

Washington's taken a larger role on climate change as the Trump Administration's actions have harmed or hampered progress, including the intention to withdraw from the Paris Agreement, and directing the EPA to repeal the Clean Power Plan.

Gov. Jay Inslee won't wait for Washington D.C. to act on climate, so Washington is leading the way. With partnerships across the country and around the world, Washington has established ourselves as a leader on climate. But we're not done yet.

### Washington Leadership

- Cap on carbon with first-in-the-nation Clean Air Rule
- Launched global alliance to combat ocean acidification
- Promoting electric vehicles, doubling the state fleet
- Clean Energy Fund investing in the next generation of clean tech
- Closing state's last coal power plant

### Working Together

- Co-founded United States Climate Alliance
- Pacific Coast Collaborative
- Under2MOU
- Governors Accord for a New Energy Future
- Co-founded International Alliance to Combat Ocean Acidification
- Bilateral alliances with Japan, France, Chile, the United Kingdom, China, and Mexico.

## Washington Leads the Way

on track for

# 29

## percent

reduction in 2005 greenhouse gasses for U.S. Climate Alliance states by 2025

# \$76

## million

in Clean Energy Fund investments since 2013

# 75

## percent

of Washington's energy production is carbon-free

aiming for

# 75

## thousand

electric vehicles by 2020
